Cover image: Model 5760 8' high, Vertical Short Panel , Mission Oak finish, Stockbridge 2 4-Lite windows, decorative hardware

Built Better from the Inside Out

Door construction

Thermacore® Collection steel garage doors feature premium insulation construction and design which provides maximum thermal efficiency and reduced air infiltration for your garage space. This durable line of garage doors gives you many years of reliable operation while providing comfort and beauty to your home, even in extreme climates.

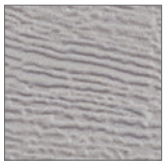
Thermacore® construction
Provides a continuous layer of foamed-in-place, CFC-free polyurethane insulation sandwiched between two layers of corrosion-resistant steel, for maximum thermal efficiency.

In-between section thermal seals
With an air infiltration rating of up to 0.08 cfm, seals provide superior resistance to the elements.

Bulb-type bottom weatherseal
Guards against wind and rain while providing a cushion when closing.

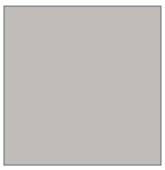
Durable finish
Interior-side hot-dipped galvanized steel backing, with two coats of baked-on polyester paint, provides strength and a finished, clean appearance.

Multiple surface options



Embossed wood grain adds beauty, sophistication and durability.

Microgroove waved pattern creates a striking light effect.



Smooth, non-textured surface gives a modern look.

Pebble grain embossement creates an appealing pattern texture.

Wind Load options
Models 5740 and 5760 are FBC approved and will provide added protection to your home during high wind events, including hurricane-force winds.
